Institut Pasteur
28, Rue du Dr Roux
75724 PARIS CEDEX 15

Dear Professor Montagnier,

It was a great pleasure to have met you at the Amsterdam Conference and to have exchanged with you our views on HIV - albeit somewhat briefly. Despite several differences, it was gratifying to find that we agreed at least on some points.

As you requested, I am enclosing some papers dealing with p24 and also:

- (1) A manuscript on antibody testing, which we understood to have been accepted for Publication in the Bulletin de l'Institut Pasteur, but which in fact was rejected.
- (2) An abbreviated version of the above manuscript which we are submitting to Res. Virol.

I am fully aware that you are extremely busy, but since I value your opinion more than anybody else's, I would be very grateful if you could find time to critically appraise our work.

Thank you.

Yours sincerely,

ELENI ELEOPOULOS
